PRESIDENT'S MESSAGE

Jerry Maxcy
President

The first half of JESCO's fiscal year 2018 has now passed us by....and we enjoy new and exciting work opportunities within our backlog. The first 7 months have seen us meet or exceed our goals in terms of financial planning and in terms of our safety program. **Thank you all so much for your continued commitment toward making our company more productive, quality-driven and successful.**

Always be mindful that our success begins with you, and is further defined by your commitment to JESCO's Core Values of **Safety....Integrity....Passion...Commitment.**

For us to continue to be a successful team, **let me challenge each of you to "focus on the present"**. Famed author & motivational speaker John Maxwell offers this simple advice from his book "Today Matters":

"If you're always thinking about tomorrow, then you'll never get anything done today. You can't change yesterday. You can't count on tomorrow. But...you can choose what you do today."

JESCO must consistently conduct our business with Integrity, never compromise on the Quality of our projects, keep Safety upper-most in our minds, and proactively manage our costs. These are the keys to our success and to the repeat business that is vital to our profitability.

Thank you all for the positive results of our first seven months. And as I always say, continue to set daring goals for yourself.....and for your teams.

Jerry

PROJECT SPOTLIGHT

JESCO was recently selected to construct a primary metals plant for Traxys. The company selected a site at Yellow Creek Port, after a national search process led by Strategic Development Group, Inc. JESCO constructs manufacturing facilities in the metals, automotive, aviation, and food processing sectors across the Southeast United States.

JESCO is unique in that it provides an integrated solutions to design-build projects, and self-performs many divisions of a typical project including mechanical, electrical, piping, plumbing, concrete, steel fabrication, steel erection, equipment setting, and start-up-testing.

Traxys is headquartered in Luxembourg and markets, distributes, and processes base metals.

HARD HAT HAPPENINGS

JESCO, Inc.
Construction

WELCOME MEADOW ROGERS

Meadow Rogers

Meadow Rogers joined the JESCO Industrial Services team on June 4, 2018. She will be assisting with payroll, accounts payable, payment applications and support for project management. Meadow and her husband Brad have two children, Braden and Alex. Please join us in welcoming Meadow to JESCO and the Industrial Services team!

FULTON POLICE DOG

JESCO C-E (MS) made a donation for the purchase and upkeep of Fulton's new Police dog, Caro.

Caro's training includes drugs, search apprehension and tracking. He is pictured with his owner Chet White and Fulton Police Chief, Mitch Nabors.

JESCO MECHANICAL-ELECTRICAL DIVISION COMPLETES PROJECTS FOR VOLVO AND MERCEDES

JESCO's Mechanical-Electrical Division worked with other units of The Yates Companies and our design partner Albert Kahn to design and construct the major buildings (other than the Paint Shop) for the grassroots Volvo Cars America new assembly plant outside Charleston, SC. The Yates Companies total Scope of Work was the Body Shop, Assembly Building, Central Energy Plant, Administrative Office Building, additional small ancillary buildings and the Site Main Distribution Trestle.

The total energy plant capacity is 7,500 tons cooling, 12,000,000 BTUH Heating Water (for paint shop) and 4,800 SCFM of compressed air. Body Shop, Assembly Building and Administrative Office are all heated by gas fire units (combination with air conditioning).

The total square feet constructed was 2,300,000 and was completed from design start to substantial completion in 22 months. The project is pursuing LEED Gold Certification.

Total field man-hours for JESCO and our subcontractors on this project was 182,487 with no lost time accidents.

JESCO's Mechanical-Electrical Division worked with other units of The Yates Companies and our design partner Barge Design Solutions to design and construct the major buildings (other than the Central Energy Plant) for the addition to the existing Mercedes Vans America assembly plant outside Charleston, SC. The total scope of The Yates Companies Scope of Work was the Body Shop, addition to an existing Assembly Building, and Paint Shop, additional small ancillary buildings and the Site Main Distribution Trestle.

The total square feet constructed was approximately 1,600,000 and was completed from design start to substantial completion in 20 months. The total construction was performed while keeping the existing assembly facility in operation.

Total field man-hours for JESCO and our subcontractors on this project were 166,669 with no lost time accidents.
