

## PRESIDENTS MESSAGE

### PRESIDENT'S MESSAGE

We are now well into our fiscal year 2019....and the hot days of summer are around the corner. There is renewed excitement about the new work prospects that summer always offers to us. To date our year has reflected positive earnings results for all JESCO's operating units along with the achievement of excellent team safety results. Thank you for continuing to embrace JESCO's Core Values which are as follows:

**Safety Integrity Passion Commitment**

For us to continue to be a successful company, let me share these observations from noted author and speaker David Cottrell :

*"The most successful people/companies are really good at three things:  
Identifying their priorities.  
Knowing when to say "no".  
Attacking procrastination.*

*The first step to managing any situation...business or personal... is to precisely understand your priorities and set your goals accordingly. There is a big difference between managing your time to accomplish real priorities and just checking off items on your to-do list."* JESCO must consistently conduct our business with integrity, never compromise on the quality of our projects, keep safety upper-most in our minds, and "proactively manage" our costs. These remain the keys to our success and to the repeat business that is vital to our profitability. Thank you all for the positive results and as always, continue to set daring goals for yourself and for your teams.

*Jerry Maxey*

## ANNIVERSARIES - Neal Houston Recognized for 72 Years of Service.

JESCO prides itself in employee longevity. Recently we were privileged to celebrate a rare milestone in the construction industry. Neal Houston has served JESCO for the past 72 years. Mr. Houston is the Machine Shop Manager in Tupelo MS. Pictured in the photo above is Jon Bramlett presenting Mr. Neal with a plaque to show our appreciation of his many years of service with us.

## PROJECT SPOTLIGHT

JESCO recently completed a greenfield project for S&A Industries, in New Albany, Mississippi. S&A Industries supplies molded automotive ducting and noise vibration damping products to Toyota, GM and major Tier 1 automotive suppliers. In addition to construction, JESCO's Millwright and Maintenance has also worked with S&A on equipment move and placement services. Agracel was the developer for this project. Agracel and JESCO have worked on a number of greenfield and tenant build-out projects. For 78 Years JESCO has focused on constructing projects for manufacturing.

## CURRENT CLIENT SPOTLIGHT

Mercedes-Benz

Mobile Airport Authority

**FISHBELT FEEDS, INC.**

## DUDY NOBLE STADIUM

JESCO completed a two-year phased construction of the New Dudy Noble Field, Polk-Dement Stadium in time for the 2019 SEC Baseball Season. Dudy Noble Stadium, home to the Mississippi State Bulldogs, is widely regarded as the Carnegie Hall of college baseball and holds numerous on-campus division one college baseball attendance records and is recognized for its unique "Left Field Lounge". The \$68 million dollar project has been reported on and given great marks from national writers and publications

## THE GRAND STORY

The "Queen of Southern Resorts" has added more sparkle to her crown. The Grand Hotel Golf Resort & Spa in Point Clear has completed a \$35 million transformation that is marked today by a rebranding from Marriott to Autograph Collection Hotels. JESCO's Alabama Construction and Engineering Division has a long history of working on this property over the last 30 plus years completing both renovation and new construction projects. This project included full upgrades and remodel to all 405 guest rooms, Conference Center, Spa, Restaurants, Pool, Lounge and back of house areas, including nine kitchens. A key part of the coordination of this project was keeping the resort fully functional throughout the entire renovation.
