COOPER TIRE

JESCO Maintenance Division provided 260 full time maintenance personnel at this facility to perform complete maintenance of the facility and production equipment. In addition, JESCO Millwright Division performed routine repairs, major overhauls, equipment relocation and foundation work.

MUELLER BRASS

JESCO's Millwright Division performed the installation of the equipment in the original facility, which included horizontal extrusion press, billet casting, draw benches, draw blocks, finishing machines, annealing furnaces and turn machines. JESCO Millwright, also installed much of the original equipment in the fittings facility and has performed general maintenance work for this facility on a ongoing basis.

KIMBERLY CLARK

JESCO's Millwright Division performed the initial equipment installation in the original non-woven facility. The Millwright Division has performed many other machine installations, maintenance, repairs, shutdowns, piping, cooling tower installation, platforms, bull gear repair, calendar roll maintenance, foundation installation, jib crane installation, interfolder installation, pellet bulk handling equipment, mills, extruders, blowers, unwinders and rewinders, slitters and shears in their ongoing relationship with Kimberly-Clark Corporation.
